

GTG

Gas cylinder transport harness made from polyester (PES)

Gas cylinder transport harnesses are the simple and cost-effective way of safely transporting gas cylinders at height (e.g. with a winch).

Four different models with diameters of 14 cm, 25 cm or 30 cm cover a wide range of applications.

Features

- 2 pairs of eyes for transporting gas cylinders of different heights.
- GTG K 14 and GTG K 25 with Velcro fastener for easier loading of the harness.
- Easy handling due to low weight.
- UV-resistant, no material ageing or embrittlement
- Gentle handling of the gas cylinders.
- Moisture-resistant fabric, thus preventing frost damage.
- Low elongation (<4%)

INFO

Yale hoists and trolleys are not designed for passenger elevation applications and must not be used for this purpose.

Technical data GTG and GTG K

Model	Art.-No.	Capacity WLL kg	Height cm	Circumference cm	Diameter cm	Number of eyes
GTG K 14	192083222	50	150	44	14	2+2
GTG 25	192020407	200	150	80	25	2+2
